Jan	7533	1135	777	5035
Feb	3757	318	109	693
3 mo. avg.	4911	618	421	2840

Hist. 3-mo rolling average inflows = 6,250 cfs (Inflow Ratio = 140.6)

Drought Index Ratio = (0+1+2)/3 = 0.0 Last Month LIP Stage = Stage -1

Evaluation Criteria for LIP Stage Implementation:

The LIP *must* be implemented beginning at Stage 0 and, if the combination of conditions becomes more severe, the Stages *must* increase in one Stage increments.

Stage 0: High Rock HWEL < NME minus 0.5 NO

OR High Rock HWEL < NME minus 0 AND US Drought Monitor => 0 NO OR High Rock HWEL < NME minus 0 AND Average Inflow < 0.48 NO

Stage 1: High Rock HWEL < NME minus 1 AND US Drought Monitor => 1 NO OR High Rock HWEL < NME minus 1 AND Average Inflow < 0.41 NO

Stage 2: High Rock HWEL < NME minus 2 AND US Drought Monitor => 2 NO OR High Rock HWEL < NME minus 2 AND Average Inflow < 0.35 NO

Stage 3: High Rock HWEL < NME minus 3 AND US Drought Monitor => 3 NO

OR High Rock HWEL < NME minus 3 AND Average Inflow < 0.30 NO

Stage 4: High Rock HWEL < $\frac{1}{2}$ of NME minus CRWE **AND** US Drought Monitor => 4 **NO OR** High Rock HWEL < $\frac{1}{2}$ of NME minus CRWE **AND** Average Inflow < 0.30 **NO**

Evaluation Criteria for Recovery (If Previous LIP Stage + Stage -1)

Recovery from this LIP will be triggered by any of the three following conditions:

Condition 1: If all three triggers associated with a lower numbered LIP Stage are met on the
first of the month, the LIP recovery will be a general reversal of the staged approach on the
first of each month.

OR

 Condition 2: If High Rock Reservoir water elevations return to at or above the NME PLUS 2.5 ft, the LIP will be discontinued immediately.

OR

 Condition 3: If High Rock Reservoir water elevations return to at or above the NME for 2 consecutive weeks, the LIP will be discontinued immediately.
